

# Manual templates

## NOTES:

- New templates are written for the three defined hypernym relations.
- Templates in usable code-format are found in separate .txt files.
- In some templates, verbs could be either plural or singular, where the nouns are unknown (X or Y). We used the plural in all these examples, but this could be changed in the future, if needed.
- All examples use 'I' as personal pronouns only. This could also be expanded.

## I) Template relation: [X is superset of Y]

Examples from data: *I like X, except Y, I like X, and more specifically Y, I like Y, an interesting type of X.*

### New templates where X is named first

I like X , and particularly Y .  
I like X , and especially Y .  
I like X , and in particular Y .  
If X did not exist, then Y would not exist either .  
I like X , and to be more specific Y .  
I like X and , narrowing it down , Y .  
I like X and , less generally , Y .  
I like X in general , but most of all Y .  
I like X in general , but Y are my favourite .  
I like X in general , but Y are my favorite .

### New templates where Y is named first (in the code versions, X comes before Y always)

I like Y , which are a kind of X .  
I like Y , which are a type of X .  
I like Y , an example of X .  
I like Y , which are an example of X .  
Y are a subtype of X .  
Y are a subclass of X .  
Y are my favourite type of X .  
Y are my favorite type of X .  
I like Y and , more generally , X .  
I like Y and , broadly speaking, X .  
I like Y and , to generalize, X .  
I like Y and , to generalise, X .  
I like Y and , in general, X .

## II) Template relation: [no hypernym rel]

Examples from data: *I do not like X, I prefer Y, I like X more than Y, I like X, and Y too.*

I prefer X over Y .

I would pick X over Y .

I would choose X over Y .

I like X , but above all, Y .

I like X , but more so Y .

I like X , but even more Y .

I like X , but even more so Y .

I like X , but Y are my favourite .

I like X , but Y are my favorite .

I like X , but my liking for Y is greater .

I like X , but my appreciation of Y is greater .

I like both X and Y .

I like X as well as Y .

I like not only X but also Y .

Apart from X , I like Y .

More than X , I like Y .

In addition to X , I like Y .

I like X to a greater extent than Y .

I like X and Y .

I like X and additionally Y .

I like X and , moreover , Y .

I like X and , moreover , I like Y .

### III) Template relation: [Y cannot be superset of X]

*Example from data: I like X, but not Y*

( 'I like animals but not pigs' is possible, 'I like pigs but not animals' is not. )

#### New templates where X is named first

I like X , however I do not like Y .

I like X , however not Y .

I like X , but on the contrary , I do not like Y .

I like X , but I do not like Y .

I like X while I do not like Y .

I like X , although I do not like Y .

I like X , yet I do not like Y .

I like X , though I do not like Y .

#### New templates where Y is named first

I do not like Y , but I like X .

I do not like Y , but on the contrary, I like X .

Although I like Y, I do not like X .

While I like Y , I do not like X .

Though I like Y, I do not like X .
